# JUNCKERS PUR CARE PROGRAMME

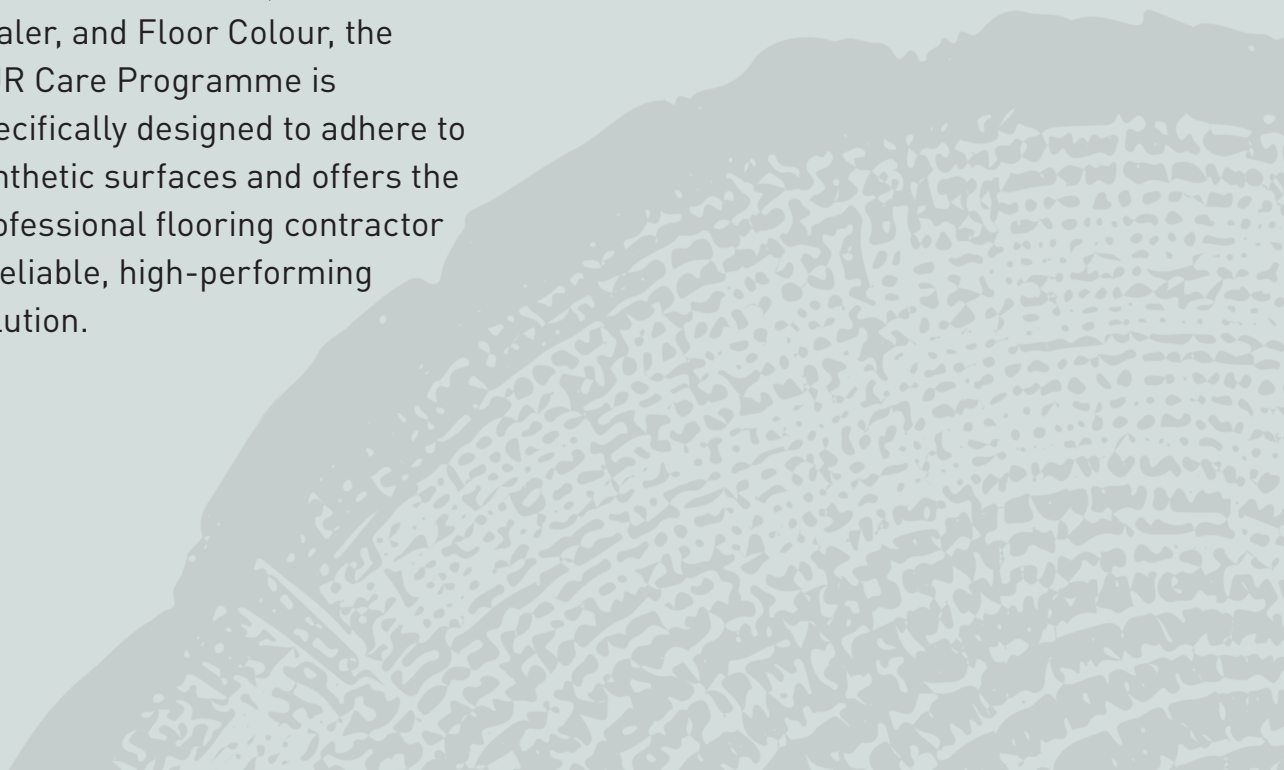

A **simple and effective** way to restore and maintain synthetic floors

---

Transform and extend the lifespan of worn floors with a new professional maintenance programme developed for PU, vinyl (PVC) and linoleum floors.

PUR is a three-part programme for maintaining and renovating synthetic floors. Comprising an Intensive Cleaner, a Floor Sealer, and Floor Colour, the PUR Care Programme is specifically designed to adhere to synthetic surfaces and offers the professional flooring contractor a reliable, high-performing solution.

Treating the floor with Junckers PUR programme will restore it to optimum condition, with the option of adding colour and design elements. It is ideal for use in schools, care homes, hospitals, healthcare, retail, workplaces, hairdressers, gyms, and sports halls.

# KEY REASONS TO USE JUNCKERS PUR CARE PROGRAMME

- Restores existing damaged coating to a beautiful new finish.
- Makes old floors look like new, eliminating scuffs and minor surface damage.
- Provides a tough, easy to clean surface with reliable slip resistance.
- A financially attractive and time-saving alternative to replacing the floor.
- Short downtime with minimal disruption.
- Add fresh, new colour to your floor with PUR Floor Colour. Choose from a wide range of colours including custom options.

## A HEALTHY INDOOR CLIMATE

Junckers PUR Floor Sealer and PUR Floor Colour carry the Danish Indoor Climate label. A product with this label has undergone extensive volatile emission and odour tests to ensure there are no chemical substances in the product which adversely affect the air quality in the room.

# SAVE TIME AND MONEY WITH PUR

With PUR, worn-out synthetic floors are given a new lease of life rather than having to be replaced. Restoring a floor with PUR introduces significant savings, in both cost and time – refurbishing a floor costs less and takes markedly less time than installing a new floor.

The 300 m<sup>2</sup> floor pictured below was restored with PUR instead of installing a new floor. The floor was back in use after just three working days. Installing a new floor is typically carried out over six days, meaning the downtime was reduced by 50%. For larger areas it is possible to save even more time.

**REDUCE  
DOWNTIME  
BY 50 %**

**PUR - A cost-effective solution  
for schools, sports centres,  
healthcare facilities, etc.**

*Corridor areas at a municipal heating plant - Treated with PUR Intensive Cleaner, sanded and finished with two coats of PUR Floor Sealer*

# HOW TO KEEP YOUR FLOOR IN TOP CONDITION

Clean the floor on a regular basis using water and a mild soap solution. We recommend using Junckers Floor Cleaner.

Inspect your floor regularly and refresh it before a complete restoration becomes necessary. Refreshing a previously PUR-treated floor can be done in one day.

We recommend establishing a service agreement with a professional floor finisher who will check the condition of your floor on a regular basis. A well-devised maintenance programme will extend the life of the floor.

Avoid maintenance with polish and wax products as they make it difficult to refresh a PUR-treated surface.

# THE PUR CARE PROGRAMME IS EASY TO USE

It is easy to use Junckers' PUR care programme. Just follow a few important guidelines to achieve a hard-wearing long-lasting result.

The programme includes a deep cleaning detergent, a robust and durable polyurethane sealer, a range of colours to add patterns, lines or to create blocks of colour, and Design Flakes for a decorative, terrazzo-like appearance.

These products provide the professional floor finisher with a reliable solution for restoring worn PU, vinyl and linoleum floors.

## PUR INTENSIVE CLEANER

A deep-cleaning detergent that effectively removes old layers of wax and polish. The product is used for intensive basic cleaning before floor restoration and is essential to ensure solid adhesion of PUR Floor Sealer to the substrate.

## PUR FLOOR SEALER

A robust and durable two-component water-based polyurethane sealer, specifically designed for restoration of PU, vinyl and linoleum floors. The product is recommended for floors with high wear and provides long-lasting protection.

## GET CREATIVE WITH COLOURS AND FLAKES

Combine PUR Floor Sealer with PUR Floor Colour, to add colours, shapes and lines to the floors – let your creativity flow! A new colour can completely change the look of a PU, vinyl or linoleum floor as well as the space where it is installed.

Add Design Flakes to give the floor a decorative and expressive look reminiscent of terrazzo. Randomly shaped black and white flakes that are perfect for adding interest and character, Design Flakes are an innovative addition to the PUR programme. Using Design Flakes can also help hide irregularities in the floor surface.

# WHERE TO USE PUR?

Use PUR on PU floors, vinyl floors (PVC) and linoleum floors in schools, offices, retail, hospitals, healthcare centres and sports facilities. With the correct preparation of the floor and a few precautions, the applications are almost limitless.

WORKPLACES

SCHOOLS

CHILDCARE CENTRES

SPORTS HALLS

RESIDENTIAL

HEALTHCARE

Please note - PUR is not suitable for LVT floors which are typically designed with a slightly textured surface.

# THE MEDIA SCHOOL IN VIBORG, DENMARK TRANSFORMED WITH PUR

Corridor areas restored with PUR Floor Colour in the colour Basalt Grey RAL 7012 and a mix of white and black Design Flakes.

BEFORE TREATMENT

AFTER TREATMENT

## WHY WE OPTED FOR PUR

*"The Media school in Viborg was looking for a solution that would not involve replacement of the existing 100 m<sup>2</sup> floor covering. I suggested Junckers' PUR Care programme, which I knew would quickly and efficiently give this type of flooring a new and appealing look.*

*The work was carried out over a weekend and in that time the floor was given a beautiful new grey colour with a terrazzo-style look. The PUR solution gave the school the opportunity to get the floors back in use with very little downtime and they now have a hard-wearing solution that will be easy to maintain in the future."*

- Michael, Professional Floor Finisher
